ENERGY POLICY

Altuğ Ambalaj, aims to implement and develop a proactive energy management system based on sustainable development in all its activities.

In this direction,

- Efficient use of energy and natural resources in all its activities
- To apply environmentally and energy-friendly technologies in new projects and equipment purchases.
- To save energy and reduce natural resource consumption by making efficiency-increasing improvements in existing processes and systems.
- Continuous improvement of energy performance through the design and supply of highly energy efficient products, processes & services.
- Continuously reviewing the provision of adequate resources (information, expertise and economic resources) to achieve energy-related goals and objectives.
- Ensuring compliance with legal and other requirements regarding energy efficiency, use and consumption.
- It is committed to increasing the awareness of all its stakeholders about renewable energy and climate change and to continuously improve it by developing energy efficiency projects that will support the principle of sustainable development.
- We take care to spread awareness about sustainability to our entire value chain by giving importance to the pursuit of sustainability criteria in our supply chain.
- By prioritizing customer satisfaction, we ensure that our customers have uninterrupted access to our services, and we offer solutions to our customers to ensure sustainable energy use.
- We follow up our Energy Policy by communicating effectively with the relevant stakeholders, review it regularly and update it when necessary.
- We are committed to ensuring that our suppliers operating in service and production comply with sustainable energy use the by 75% by 2030.
